SUMMARY

Computer Science (AI & ML) undergraduate with strong foundations in Software Engineering, Data Structures & Algorithms, and Backend Development. Experienced in designing scalable full-stack applications using Java, Python, FastAPI, React.js, and modern machine learning frameworks. Passionate about solving complex engineering problems, building distributed software systems, and developing high-performance production-ready applications.

EDUCATION

RVR & JC College Of Engineering

B.Tech in Computer Science and Engineering (AI & ML) [CGPA: 8.89 / 10.0]

Guntur, Andhra Pradesh

Aug. 2023 – April 2027

RGUKT(IIT) Ongole Campus

MBiPC [CGPA: 9.4 / 10.0]

RK valley, kadapa

Dec. 2021 – May 2023

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript

Machine Learning & Data Analysis: Scikit-learn, XGBoost, SHAP, Pandas, NumPy

Frontend: HTML, CSS, JavaScript, Bootstrap

Frameworks: React.js, FastAPI, Flask, Node.js, Express.js

Databases: MongoDB, MySQL, SQLite

Developer Tools: Git, GitHub, Postman, Linux, VS Code

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROJECTS

Credit Card Fraud Detection System | XGBoost, FastAPI, React.js, SHAP, Scikit-Learn May 2026-Jun. 2026

 GitHub  Live

- Developed an end-to-end credit card fraud detection system using XGBoost, achieving 98.01% ROC-AUC, 87.95% PR-AUC, and 89% fraud recall on highly imbalanced financial transaction data.
- Designed and implemented scalable RESTful APIs using FastAPI to process real-time transaction requests with low-latency prediction responses.
- Implemented SHAP-based explainability to surface the top contributing features behind model predictions, improving transparency and interpretability.
- Engineered a responsive React.js frontend integrated with FastAPI backend through REST APIs, enabling seamless real-time transaction analysis.
- Deployed cloud-hosted frontend and backend services on Vercel and Render with secure API communication, CORS configuration, and production deployment practices.

AI Agri-ChatBot | Python, Flask, SQLite, OpenAI API

June 2025

 GitHub  Live

- Designed and developed a full-stack AI chatbot supporting text, voice, and image interactions using Flask, SQLite, and OpenAI APIs.
- Integrated OpenAI API to enable contextual query understanding and accurate recommendation generation.
- Designed backend APIs for real-time image analysis and recommendation generation while ensuring efficient request processing.

EXPERIENCE

AI-Intern

Oct. 2025 – Nov. 2025

Infosys Springboard — Virtual

- Developed scalable backend services and AI-powered chatbot modules using Flask, SQLite, and OpenAI APIs while collaborating in an Agile virtual internship environment.

ACHIEVEMENTS

- Solved 300+ algorithmic problems on LeetCode covering Graphs, Dynamic Programming, Trees, Greedy Algorithms, and Advanced Data Structures.
- Qualified GATE 2026 (Computer Science) with a score of 363 through self-preparation, demonstrating strong analytical ability and core computer science knowledge.
- Maintaining a CGPA of 8.89 / 10.0 in B.Tech (CSE – AI & ML)
- Secured 2nd place in “Techexplore” technical poster presentation for innovative problem analysis
